

Application No.: 10/602,829

Docket No.: W0200.0128/P128

**AMENDMENTS TO THE SPECIFICATION**

Page 5, paragraph 4:

To fit these three modularized items to the roof panel, after placing the roof trim in a position where the attachment members of the accessories match attachment holes in the roof panel, the attachment members of the accessories are pressed in towards the roof panel. Then, the connecting portions of the attachment members protrude towards the roof panel and are snapped into the attachment holes in the roof panel and, with the roof trim pinched between the brackets and the attachment members, the three items tightly secured.

Page 12, paragraph 1:

The inserted body 60 is composed of a PP resin injection molding. Thus, to be inserted into the space formed by the connecting portions 54a, 54b and 54c extending in three directions, the inserted body 60 is provided with a stopper portin 61 to perform a stopper function, a cover flange 62 to lid an opening 50a formed in the attachment member 50, and a back plate 63 to be in contact with the inside ~~of the~~ of the leg member 53 and to permit sliding inserted body in a state of face contact. At the base of the stopper portion 61 is formed a securing groove 64 with which a pawl 57 provided in the ~~of the~~ leg member 53 is to be engaged.
